Art & Alchemy Jacob Wamberg 2006 This collection of articles covering the time span from the Late Middle Ages to the twentieth century intends to challenge the current neglect of the interplay between esoteric knowledge and the visual arts. 'Art and Alchemy' indicates that alchemy indeed has several connections with art by examining some of the pictorial and literary books that disseminated alchemical symbols and ideas, delving into images, which in one way or another can be shown to appropriate and interpret alchemical ideas or environments, and expanding the scope of alchemical imagery by indicating structural affinities between alchemical processes and artistic creation.

The Black Sun Stanton Marlan 2008-05-08 Also available in an open-access, full-text edition at http://oaktrust.library.tamu.edu/handle/1969.1/86080 The black sun, an ages-old image of the darkness in individual lives and in life itself, has not been treated hospitably in the modern world. Modern psychology has seen darkness primarily as a negative force, something to move through and beyond, but it actually has an intrinsic importance to the human psyche. In this book, Jungian analyst Stanton Marlan reexamines the paradoxical image of the black sun and the meaning of darkness in Western culture. In the image of the black sun, Marlan finds the hint of a darkness that shines. He draws upon his clinical experiences—and on a wide range of literature and art, including Goethe’s Faust, Dante’s Inferno, the black art of Rothko and Reinhardt—to explore the influence of light and shadow on the fundamental structures of modern thought as well as the contemporary practice of analysis. He shows that the black sun accompanies not only the most negative of psychic experiences but also the most sublime, resonating with the mystical experience of negative theology, the Kabbalah, the Buddhist notions of the void, and the black light of the Sufi Mystics. An important contribution to the understanding of alchemical psychology, this book draws on a postmodern sensibility to develop an original understanding of the black sun. It offers insight into modernity, the act of imagination, and the work of analysis in understanding depression, trauma, and
transformation of the soul. Marlan’s original reflections help us to explore the unknown darkness conventionally called the Self. The image of Kali appearing in the color insert following page 44 is © Maitreya Bowen, reproduced with her permission, maitreyabowen@yahoo.com.

Western Esotericism and the Science of Religion
International Association for the History of Religions. Congress 1998
This volume is based upon papers read during the innovative section "Western Esotericism and the Science of Religion" organized at the 17th International Congress of the International Association for the History of Religions (IAHR) in Mexico City, August 5-12, 1995. The section was created in order to fill a long-standing hiatus in the academic study of religions: whereas phenomena such as gnosticism and hermetism in antiquity, and even the occult sciences of that period, have long been recognized as subjects worthy of serious investigation, the history of similar and related phenomena in more recent periods has hardly received
the same measure of scholarly attention and recognition. The present volume is devoted to the academic emancipation of these areas as constituting a legitimate domain of research, which may be referred to by the generic label "western esotericism". Preceded by an introductory essay on the birth of this new discipline in the study of religion, the volume provides a sample of current research in the field and devotes special attention to some central methodological questions.

The Book of Abraham the Jew Abraham Eleazar 2015-04-09 Hans Nintzel added this work to the R.A.M.S. Library in 1982. It is from the British Museum printed book, 122 pages, 8905 A 15 in German "Donum Dei" (Samullis Baruch), "Abraham the Jew" (in German), 87 pages bound with 9005 A 15. Abraham Eleazar was probably a fictitious name used by the author. It appears that the book was first published in Leipzig in 1760 with the title, "R. Abrahami Eleazaris Uraltes Chymisches Werk," although an edition from 1735 is said to exist (see Note at the end of the Forward). The author might have been Julius Gervasius of Schwarzburg. The Forward states that the author took illustrations from the copper tablets of Tubal-Cain, a person mentioned in Genesis 4:22.

Alchemy in Contemporary Art Urszula Szulakowska 2017-07-05 Alchemy in Contemporary Art analyzes the manner in which twentieth-century artists, beginning with French Surrealists of the 1920s, have appropriated concepts and imagery from the western alchemical tradition. This study examines artistic production from c. 1920 to the present, with an emphasis on the 1970s to 2000, discussing familiar names such as Andre Breton, Salvador Dali, Yves Klein, Joseph Beuys, and Anselm Kiefer, as well as many little known artists of the later twentieth century. It provides a critical overview of the alchemical tradition in twentieth-century art, and of the use of occultist imagery as a code for political discourse and polemical engagement. The study is the first to examine the influence of alchemy and the Surrealist tradition on Australian as well as on Eastern European and Mexican art. In addition, the text considers the manner in which women artists such as Leonora Carrington, Remedios Varo, and Rebecca Horn have critically revised the traditional sexist imagery of alchemy and occultism for their own feminist purposes.
The Essential Golden Dawn Chic Cicero 2003 For those who want to find out about what the Golden Dawn is and what it has to offer, this book
answers questions about its philosophy, principles, and history. **Max Ernst and Alchemy** M. E. Warlick 2013-05-01 Surrealist artist Max Ernst defined collage as the "alchemy of the visual image." Students of his work have often dismissed this comment as simply a metaphor for the transformative power of using found images in a new context. Taking a wholly different perspective on Ernst and alchemy, however, M. E. Warlick persuasively demonstrates that the artist had a profound and abiding interest in alchemical philosophy and often used alchemical symbolism in works created throughout his career. A revival of interest in alchemy swept the artistic, psychoanalytic, historical, and scientific circles of the late nineteenth and early twentieth centuries, and Warlick sets Ernst's work squarely within this movement. Looking at both his art (many of the works she discusses are reproduced in the book) and his writings, she reveals how thoroughly alchemical philosophy and symbolism pervade his early Dadaist experiments, his foundational work in surrealism, and his many collages and paintings of women and landscapes, whose images exemplify the alchemical fusing of opposites. This pioneering research adds an essential key to understanding the multilayered complexity of Ernst's works, as it affirms his standing as one of Germany's most significant artists of the twentieth century.

**Disknowledge** Katherine Eggert 2015-10-02 'Disknowledge': knowing something isn't true, but believing it anyway. In this book, Katherine Eggert explores the crumbling state of learning in the 16th and 17th centuries. Even as the shortcomings of Renaissance humanism became plain
to see, many intellectuals of the age had little choice but to treat their familiar knowledge systems as though they still held. Humanism thus came to share the status of alchemy: a way of thinking simultaneously productive and suspect, reasonable and wrongheaded.

In clear and easy to understand terms, Cotnoir illuminates the twin aspects of alchemy—the spiritual and the physical—and finally removes the veil from this mysterious and oft-misunderstood pursuit. These conversations include discussions of the natural world, the practice of natural philosophy, and the apocalypse.

The Sabbatean Prophets Matt GOLDISH

2009-06-30 In the mid-seventeenth century, Shabbatai Zvi, a rabbi from Izmir, claimed to be the Jewish messiah, and convinced a great many Jews to believe him. The movement surrounding this messianic pretender was enormous, and Shabbatai's mission seemed to be affirmed by the numerous supporting prophecies of believers. The story of Shabbatai and his prophets has mainly been explored by specialists in Jewish mysticism. Only a few scholars have placed this large-scale movement in its social and historical context. Matt Goldish shifts the focus of Sabbatean studies from the theology of Lurianic Kabbalah to the widespread seventeenth-century belief in latter-day prophecy. The intense expectations of the messiah in Christianity, Judaism, and Islam form the necessary backdrop for understanding the success of Sabbateanism. The seventeenth century was a time of deep intellectual and political ferment as Europe moved into the modern era. The strains of the Jewish mysticism, Christian millenarianism, scientific innovation, and political transformation all contributed to the development of the Sabbatean movement. By placing Sabbateanism in this broad cultural context, Goldish integrates this Jewish messianic movement into the early modern world, making its story accessible to scholars and students alike. Table of Contents: Preface Prologue 1. Messianic Prophecy in the Early Modern Context 2. Nathan of Gaza and the Roots of Sabbatean Prophecy 3. From Mystical Vision to Prophetic Explosion 4. Opponents and Observers Respond 5. Prophecy after Shabbatais Apostasy Notes Index Reviews of this book: Goldish looks at the Jewish messianic surge of the 17th century, which culminated with the Sabbatean movement, and places it in a broader multidimensional context...He has produced a well-written, scholarly addition and modification to the literature. --Paul Kaplan, Library Journal
